## Industry and Tertiary Sectors towards Clean Energy Transition

Guest Editors:

### **Dr. Claudia Toro**

ENEA—Italian National Agency for New Technologies, Energy and Sustainable Economic Development, Energy Efficiency Department, Casaccia Research Center, 00123 Rome, Italy

### **Dr. Chiara Martini**

ENEA—Italian National Agency for New Technologies, Energy and Sustainable Economic Development, Energy Efficiency Department, 00196 Rome, Italy

Deadline for manuscript submissions:

**closed (25 January 2022)**

### **Message from the Guest Editors**

Dear Colleagues,

The Guest Editors are inviting submissions to a Special Issue of *Energies* focused on “Industry and Tertiary Sectors Towards Clean Energy Transition”. The clean energy transition from the use of non-renewable energy sources to renewable sources is part of the wider transition to sustainable economies through the use of renewable energy, the adoption of energy saving measures and sustainable development techniques.

The Special Issue will focus on technical, financial and policy-related aspects linked to the transition of economic sectors towards energy saving and decarbonization. These aspects are interrelated and as such they would be better analyzed with an interdisciplinary approach. Collecting and analyzing quantitative data would allow researchers to better understand the clean energy transition process, and how regulatory and policy frameworks are contributing to it. The suitable research areas where authors should focus on their papers are energy efficiency and clean energy key technologies, renewables sources, energy management and monitoring systems, energy policies and regulations as well as economical and financial aspects.

Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
