## Integration of Electrical Vehicles and Renewable Energy Resources into Power Distribution Networks

Guest Editors:

**Prof. Dr. Mohamed Emad Farrag**

School of Computing,  
Engineering and Built  
Environment, Glasgow  
Caledonian University, Glasgow  
G4 0BA, UK

**Prof. Dr. Ghanim A. Putrus**

Department of Mathematics,  
Physics and Electrical  
Engineering, Northumbria  
University, Newcastle upon Tyne  
NE1 8ST, UK

**Dr. Ahmed Aboushady**

School of Computing,  
Engineering and Built  
Environment, Glasgow  
Caledonian University, Glasgow  
G4 0BA, UK

### Message from the Guest Editors

This **Special Issue** focuses on recent advances in technology for EVs charging schemes that reduce the degradation of the EV batteries that support its use as ancillary service provider to the grid with the consideration of high penetration of RES. It includes, but is not limited to, the following topics:

- Power electronic converter for (DC) charging of EVs with bidirectional capability
- Investigation of the synergy between RES and EV charging demand
- Power management techniques for EV/RES systems to reduce grid congestion
- Intelligent systems for optimal sizing, location, and control of EVs as energy storage to enhance the voltage profile and relive grid loadings
- Charging electric vehicles from RES in microgrids

Deadline for manuscript  
submissions:

**closed (15 September 2022)**

Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
