Deadline for manuscript  
submissions:

**closed (31 December 2021)**

### Message from the Guest Editor

In the past few decades, extensive efforts have been employed to synthesize new materials to develop clean energy technologies that satisfy the growing energetic demand and reduce the economic and environmental impacts due to the use of fossil fuels. The aim of this Special Issue is to address new insights into solar energy conversion and, in particular, solar cell applications, thanks to the advanced studies led in the material science field, which covers all the subjects related to physics phenomena comprehension, chemistry application and device fabrication.

Particular interest is devoted to solar cells, their component analysis, individual cells and/or complete photovoltaic modules, including their economic aspects and scale-up possibilities.

Also photothermal, photochemical and electrochemical devices are highly welcomed, due to the great impact that their applications can imply in reaching the goal of renewable materials exploitation and application.

To reach this goal, a synergistic work has to be done by coupling experimental and theoretical approaches. Cutting-edge experimental techniques in combination with theoretical modelling are needed.

Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
