## Nearshore Wind and Wave Energy Potential

Guest Editor:

**Dr. Florin Onea**

Department of Mechanical Engineering, Faculty of Engineering, Dunarea de Jos University of Galati, 800008 Galati, Romania

Deadline for manuscript submissions:

**closed (1 November 2021)**

### Message from the Guest Editor

We are inviting submissions to a Special Issue of *Energies* on the subject area of "The Nearshore Wind and Wave Energy Potential". Coastal areas represent suitable environments for the development of marine energy farms, with the most promising concepts being associated with wind and wave energy extraction. Since there is a strong connection between the two resources, and the offshore wind sector is a mature market, especially in Europe, co-locating wave farms together with existing wind projects represent a viable approach.

This Special Issue will cover the following research directions: a) assessment of the wind and wave resources from the nearshore area; b) performance evaluation of various converters located in this environment; c) the identification of future opportunities in the marine renewable market, such as coastal protection, joint wind-wave projects, or airborne wind systems.

## Editor-in-Chief

### **Prof. Dr. Enrico Sciubba**

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compindex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
