submissions:

closed (15 November 2019)

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims at providing the state-of-the-art on open energy data analytics, its availability in the different contexts, i.e., country peculiarities, and at different scales, i.e., building, district and regional for data-aware planning and policy-making.

For all the aforementioned reasons, we encourage researchers to share their original works on the field of open data and energy analytics. Topics of primary interest include, but are not limited to:

1. Open data and energy sustainability;
2. Open data science and energy planning;
3. Open science and open governance for sustainable development goals;
4. Key performance indicators of data-aware energy modelling, planning and policy;
5. Energy, water and sustainability database for building, district and regional systems;
6. Best practices and case studies.

Dr. Benedetto Nastasi

Dr. Massimiliano Manfren

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
