Renewable Energies—Recent Advances in Energy Harvesting

Guest Editors:

Dr. Riaz Ahmed

Department of Mechanical Engineering, University of Wisconsin—Green Bay, Green Bay, WI 54311, USA

Dr. Sourav Banerjee

Department of Mechanical Engineering, University of South Carolina, Columbia, Columbia, SC 29208, USA

Dr. Hossain Ahmed

Department of Mechanical Engineering, University of South Carolina, Columbia, Columbia, SC 29208, USA

Deadline for manuscript submissions:

closed (30 November 2021)

Message from the Guest Editors

Dear colleagues,

Energy harvesting and renewable energy technologies have gained tremendous interest during the last decade due to their ability to provide clean and sustainable energy. While energy harvesting technologies are focused on feeding low-power electronic devices, renewable energy technologies can generate large volumes of electrical energy for industrial and household needs. Scientific communities and multidisciplinary industries are coming forward to enhance these domains from various sources as well as to improve the overall systems for prototyping and commercialization.

This Special Issue aims to receive original research and review articles on the state-of-the-art research activities as well as novel ideas on renewable energy with an emphasis on energy harvesting. Unique and multidisciplinary aspects of energy harvesting starting with a novel idea/concept generation to the realization of the systems will be considered.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
