## Sector Coupling for Sustainable Urban and Regional Energy Systems

Guest Editors:

**Prof. Dr. Gernot Stöglehner**

Institute of Spatial Planning,  
Environmental Planning and  
Land Rearrangement (IRUB),  
University of Natural Resources  
and Life Sciences, 1190 Vienna,  
Austria

**Dr. David Woess**

Institute for Chemical and Energy  
Engineering (IVET), University of  
Natural Resources and Life  
Sciences, 1190 Vienna, Austria

**Dr. Georg Neugebauer**

Institute of Spatial Planning,  
Environmental Planning and  
Land Rearrangement (IRUB),  
University of Natural Resources  
and Life Sciences, 1190 Vienna,  
Austria

### Message from the Guest Editors

Sector coupling is a pressing issue for integrating volatile renewable energy sources into urban and regional energy systems. Holistically modelling and planning sector coupling means integrating energy savings, energy efficiency, renewable energy generation, energy storage, and energy distribution. Options for sector coupling are also determined by the spatial fabric with consideration of the diversity and density of residential, commercial, industrial, recreational, agricultural, etc. land uses and mobility in urban areas and regions.

This Special Issue welcomes research approaches and innovative ideas that address sector coupling from different perspectives for the sustainable development of urban and regional energy systems and support the energy transition for a decarbonized society and economy.

We are looking forward to receiving your contributions.

Deadline for manuscript  
submissions:

**closed (20 May 2021)**

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
