Deadline for manuscript submissions:

**closed (15 January 2022)**

### Message from the Guest Editors

Dear Colleagues,

Sustainable urban development issues have acquired particular relevance over recent decades. “Make cities and human settlements inclusive, safe, resilient and sustainable” is Goal 11 of the SDGs. The tasks of this SDG are primarily to improve the environment of cities and the availability and safety of housing and infrastructure. As a result of rapid urbanization, the authorities are forced to rethink and determine how the urban infrastructure will be created, how public services will be provided, how citizens will participate in managing the development of the city, and how all these subsystems will be interconnected. The goal is not only convenience in this case but also the transformation of cities into more sustainable and reliable environments. ICT-driven innovations for the smart urban environment are at the heart of this transformation. Sustainable development based on smart innovations (technologies) will make cities flexible, adaptable, mitigate adverse impacts, and stimulate beneficial socio-economic and environmental changes.

Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
