Message from the Guest Editor

Dear Colleagues,

The sustainable development of northern territories is naturally associated with energy-saving and enhancement of energy efficiency by applied technologies and equipment, including clean and renewable energy. This current Special Issue focuses on the main problems faced when implementing solar energy in northern territories, which have their features. It is essential within the global energy transition and sustainable energy grids to reduce modern society's environmental pressure.

Topics of interest include, but are not limited to, the following:

- solar energy
- renewable energy
- photovoltaics
- district heating and cooling
- energy transition
- energy efficiency
- energy planning
- smart grids

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
