Advances in Solar Thermal Energy Storage Technologies

Guest Editor:

Dr. Sheikh Khaleduzzaman Shah

Renewable Energy and Energy Efficiency Group; Department of Infrastructure Engineering, School of Electrical, Mechanical and Infrastructure Engineering (EMI); Faculty of Engineering and Information Technology (FEIT); The University of Melbourne, Melbourne, VIC 3010, Australia

Deadline for manuscript submissions:

closed (31 July 2023)

Message from the Guest Editor

This is a topical issue dedicated to the recent advances in this very broad field—the main criteria for paper acceptance, being academic excellence, originality and novelty of applications, methods or fundamental findings. All types of research approaches are equally acceptable: experimental, theoretical, simulation, optimisation and their mixtures; the papers can be both of fundamental or applied to nature, including industrial case studies. With such a wide brief, it is naturally very difficult to define a finite list of relevant disciplines. However, it is broadly anticipated that the authorship and ultimate readership would come from the fields of civil, mechanical, architecture, renewable energy, energy resources, earth, and environmental—that is everywhere where “Advances in Solar Thermal Energy Storage Technologies” phenomena may play an important role or be a subject of worthy research pursuits. Cross-disciplinary research and development studies will also be most welcome.

Special Issue

energies

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
