## Solar Thermal Energy for Net Zero Energy Buildings

Guest Editors:

**Dr. Pinar Mert Cuce**

Department of Architecture,  
Faculty of Engineering and  
Architecture, Recep Tayyip  
Erdogan University, 53100 Rize,  
Turkey

**Dr. Yahya Sheikhejad**

Department of Mechanical  
Engineering & Centre for  
Mechanical Technology and  
Automation, University of Aveiro,  
3810-193 Aveiro, Portugal

**Dr. Erdem Cuce**

Department of Mechanical  
Engineering, Faculty of  
Engineering and Architecture,  
Recep Tayyip Erdogan University,  
Rize 53100, Turkey

### Message from the Guest Editors

To further spread the technologies and methods related to solar thermal energy systems towards NZEBs, this Special Issue, entitled “Solar Thermal Energy for Net Zero Energy Buildings”, has been proposed for the international journal *Energies*, which is an SSCI and SCIE journal. This Special Issue mainly covers original research and studies related to the above-mentioned topics, including, but not limited to, solar thermal collectors, concentrating solar collectors, building-integrated photovoltaic/thermal collectors (BIPV/T), solar-assisted heat pumps, passive solar energy technologies, Trombe walls, solar-driven energy storage, waste heat recovery systems, and so on. Papers nominated for this Special Issue are subject to a meticulous peer-review process with the goal of fast and effective dissemination of research results, developments, and applications.

Deadline for manuscript  
submissions:

**closed (31 October 2022)**

## Editor-in-Chief

### **Prof. Dr. Enrico Sciubba**

Department of Mechanical and  
Aerospace Engineering,  
University of Roma Sapienza, Via  
Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
