Successful Deployment of Renewable Energies

Guest Editor:

Prof. Dr. Sébastien Bourdin

Sustainable and Regional
Development, EM Normandie
Business School, CEDEX, 76087
Le Havre, France

Deadline for manuscript
submissions:

closed (20 December 2022)

Message from the Guest Editor

This Special Issue is dedicated to the analysis of the recent advances on the successful deployment of renewable energies. All types of the following research approaches are acceptable: experimental, theoretical, numerical, analytical, computational, case studies, and their mixtures. The main criteria for paper acceptance are academic excellence, scientific soundness, and the originality and novelty of applications, methods, fundamental findings, or experiments.

The Special Issue will include the following topics:

- ▶ Understanding the issues of environmental and social acceptability;
- ▶ Analyzing the social, economic, and environmental impacts of renewable energies projects and their link with success and failures of these projects;
- ▶ Identifying the conditions to be met for success to create shared value;
- ▶ Determining criteria and evaluating the conditions for project success;
- ▶ Proposing the integration of different theories to propose an integrated theory to explain the success of projects.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
