University, Kalisz 62-804, Poland

**Prof. Dr. Marta Starostka-  
Patyk**

Faculty of Management, Calisia  
University, Kalisz 62-804, Poland

Deadline for manuscript  
submissions:

**closed (31 March 2023)**

### Message from the Guest Editors

Implementing sustainable development requires many different activities in three main areas—economic, ecological, and social. These activities, on the one hand, are the result of the formulated goals of sustainable development. On the other hand, they result from the constantly changing conditions in which we currently operate. As a result, sustainable development remains a current topic. A key question at the moment is how the last two years of the COVID-19 pandemic will affect the implementation of the assumptions, goals, and objectives of sustainable development, not forgetting, however, about the continuous development, which also influences the shaping of this concept. Therefore, this Special Edition aims to present the very concept of sustainable development and define/identify its future challenges and directions for further development. We cordially invite scientists to submit original research papers that will allow you to understand the concept of sustainable development and define its overall picture concerning its dimensions.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
