Message from the Guest Editor

Dear Colleagues,

The recent EU Directives (on Energy Performance in Buildings—2018/844, Renewable Energy—2018/2001, and Energy Efficiency—2018/2002) and the Paris Agreement ratified by at least **180 out** of 197 Parties to the Conventions show the trends of the near and medium future.

European initiatives, like the Covenant of Mayors, the regional energy policy and governance, Clean Energy for EU islands, and the Strategic Energy Technologies Plan (SET-Plan), contribute in an essential manner in the formulation and implementation of such policy and technology scheme. In parallel, though increasing the share of RE is high on the policy agenda, the general public had been slow to adopt it since the formation of cooperatives to combine energy poverty alleviation and democracy, alternative funding schemes, and cooperative models.

The selection of papers for this Special Issue will be based on:

- Their innovation, in order to become a global S&T paradigm;
- Their pure scientific and applied technology findings;
- Their new and alternative APPROACH

Prof. Dr. Theocharis Tsoutsos

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
