Thermal Energy Perspectives for the 21st Century

Guest Editor:

Dr. Irina G. Akhmetova

Department of Economics and
Organization Production, Kazan
State Power Engineering
University, 420066 Kazan, Russia

Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editor

The rapid growth of demand for power in the 21st century and the crisis state of the environment cause several technological problems in heat power engineering that should be addressed based on modern criteria for energy efficiency, while reducing costs and minimizing the environmental impact.

This Special Issue entitled “Thermal Energy Perspectives for the 21st Century” aims to perform a comprehensive analysis and discussion of fundamental problems of thermal and power engineering, and the further development paths, i.e., the issues of improving traditional and promising energy technologies in the 21st century.

Eudossiana 18, 00184 Roma, Italy

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Control and Optimization)
