Canada

Deadline for manuscript  
submissions:

**closed (20 December 2021)**

### Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus on thermal and thermal solvent recovery processes for extracting heavy oil and bitumen, including steam-based (e.g., CSS and SAGD), thermal solvent (e.g., ES-SAGD, SA-SAGD), warm solvent-rich (e.g., NSolv), and air injection (e.g., THAI, CAGD) recovery methods. Given the global demand for heavy oil feedstocks and the cost and emission intensities of the current recovery processes, there is a need for a deeper understanding of the current methods to enable improvement as well as development of new technologies that will significantly lower cost and emission intensities. We invite submissions to this Special Issue, which will focus on new fundamental and applied contributions in the area of thermal and thermal solvent recovery methods for heavy oil recovery.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
