and Architecture, University of  
Pavia, via Ferrata 3, 27100 Pavia,  
Italy

Deadline for manuscript  
submissions:

**closed (30 June 2017)**

### Message from the Guest Editor

Dear Colleagues,

With “energy systems” we are considering all the thermodynamic systems where heat and mass transfer occurs. Such systems implicate a huge number of phenomena and applications, from space to ground. Therefore, in order to make the contents of this Special Issue more homogeneous, we would like to focus to the specific area where recently advanced and innovative numerical and analytical modeling techniques have been successfully implemented. Such methods may have a great impact for the comprehension and virtual reproducibility of physical phenomena, supporting the increase of industrial system performance and thermal efficiency. I am very glad to invite all the colleagues and scientists working in the field of thermo-fluid dynamics and thermal sciences to submit a paper with at least two of the following three main characteristics: (1) inspiring or offering a better explanation of physical processes, (2) with a clear link to a high impact and novel application, and (3) containing an original advancement in terms of numerical modeling or methods.

Prof. Dr. Marco Marengo

Eudossiana 18, 00184 Roma, Italy

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
