## Tidal Turbines

Guest Editors:

**Prof. Dr. Sylvain Guillou**

Cherbourg University Laboratory  
of Applied Sciences LUSAC,  
University of Caen Normandy, 60  
Rue Max-Pol Fouchet, 50130  
Cherbourg-en-Cotentin, France

**Dr. Eric L. Bibeau**

Department of Mechanical  
Engineering, University of  
Manitoba, Winnipeg, MB R3T  
2N2, Canada

Deadline for manuscript  
submissions:

**closed (30 June 2021)**

### Message from the Guest Editors

Tidal turbines generate energy from tidal currents. One of the major interests of this renewable energy is its predictability. With its predictability, tidal turbines are ideally suited to be integrated with smart grids. The areas of interest for the installation of these devices are spread all over the world. They are characterized by a complex bottom morphology and flow due to currents which can be disturbed by waves, the presence of sediments, or objects transported by the flow. The design, positioning of the turbines, maintenance, and interactions must consider these aspects. At present, the cost of tidal turbines is higher than that of technologies such as wind turbines, and reducing this cost remains a challenge from the design of the machine to the installation and maintenance operation.

## Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Control and Optimization)
