

Special Issue

Climate Change and Sustainable Energy Transition

Message from the Guest Editor

The Special Issue “Climate Change and Sustainable Energy Transition” calls for papers covering the various dimensions of climate change and the ongoing transition to sustainable energy. This Special Issue aims to cover the broader dimensions of the ongoing sustainable energy transition. Papers are invited around topics such as global warming and climate change, energy resources, energy transition, renewable energy, low carbon technologies, energy efficiency, energy digitalization, distributed energy, hydrogen and fuel cells, electric vehicles, smart energy solutions, energy markets, and energy policy. Papers on these topics can have a diverse scope, including but not limited to scientific and technological advancements, policy development and implementation, and system application and case studies.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
