

Special Issue

Solutions towards Zero Carbon Buildings

Message from the Guest Editors

We are delighted to announce the launch of a special issue on "Solutions towards Zero Carbon Buildings". This special issue aims to explore innovative strategies, technologies, and policies that contribute to the transition to zero carbon buildings, paving the way for a sustainable and low-carbon future. As the global focus on mitigating climate change intensifies, the urgency to reduce carbon emissions from the built environment has never been greater. We invite all related researchers to contribute their expertise to this special issue, and accelerate the shift towards zero carbon buildings. Topics of interest for submission include, but are not limited to:

- New zero carbon building concepts
- Solutions for retrofitting
- Low carbon construction products
- Integration of renewable energy systems in buildings
- Energy efficient building management and control systems
- Application of the IoT and/or AI in buildings

Don't miss this chance to share your groundbreaking research, innovative solutions, and practical experiences with a global audience of researchers, practitioners, and policymakers. Together, let us shape a sustainable future through zero carbon buildings.

Guest Editors

Prof. Dr. Bruno Peuportier

Centre Efficacité Énergétique des Systèmes, Mines Paris - PSL, 60 Bd Saint-Michel, CEDEX 06, 75272 Paris, France

Dr. Zsuzsa Szalay

Department of Construction Materials and Technologies, Budapest University of Technology and Economics (BME), 1111 Budapest, Hungary

Deadline for manuscript submissions

closed (21 August 2024)

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
