

Joint Special Issue

Sustainable Energy Consumption

Message from the Guest Editors

This Special Issue, “Sustainable Energy Consumption”, addresses the different perspectives of energy consumption and demand for ensuring energy sustainability, increased energy efficiency, and reasonable energy costs. We invite papers on innovative scientific and technical developments, sound case studies, and reviews, which are relevant and/or related to “Sustainable Energy Consumption”. Selected papers are expected to propose models, methods, and tools that address demand response, demand side management, consumption analysis and profiling, as well as different aspects related to energy demand and its management in the scope of sustainable energy systems. In this sense, the topics of interest also include smart grids, renewable-based generation, energy storage systems, distributed energy resources, efficient energy buildings, electric and hybrid vehicles, as long as the energy consumption aspects are considered.

Guest Editors

Prof. Dr. Carlos Ramos

Prof. Dr. Zita Vale

Prof. Dr. Peter Palensky

Prof. Dr. Hiroaki Nishi
