

Topical Collection

State-of-the-Art of Electrical Power and Energy System in China

Message from the Collection Editor

We are inviting submissions to the *Energies* Topical Collection on “[State-of-the-Art of Electrical Power and Energy System in China](#)”. This Topical Collection is focused on reviews and technical studies on the generation, conversion, storage, transmission, application, and architecture of electrical power and energy systems, particularly in China. China is a large country in the production and application of electrical energy with related technologies. The involvement of large demand and extensive utilization of electric energy in China often forms a unique electrical energy architecture and system scale. On such a scale, related technologies in the field of electrical energy and energy systems can be combined organically.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
