

## Special Issue

# Fault Detection and Diagnosis of Electrical Power System Equipments

### Message from the Guest Editors

The efficient monitoring of fault-detection systems reduces overall system cost, system discontinuity, and hardware-based redundancy realization. Additionally, annual maintenance plans and consequent costs can be optimized. Topics of interest for this Special Issue include (with emphasis on electrical power equipment), but are not limited to:

- Electrical power equipment monitoring;
- Condition monitoring;
- Data-driven approaches, including machine learning methods;
- Electrical power devices;
- Fault analysis;
- Fault detection and diagnosis;
- Fault ride through;
- Incipient faults;
- Online and offline condition monitoring techniques;
- Signal-based approaches for feature extraction.

---

### Guest Editors

Prof. Dr. Ibrahim B.M. Taha

Prof. Dr. Nagy Elkalashy

Dr. Hossam A. Abd El-Ghany

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Aerospace Engineering, University of Roma Sapienza, Via Eudossiana 18, 00184 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
