Special Issue

Hydrothermal Carbonization

Message from the Guest Editor

The guest editor is inviting submissions to a Special Issue on *Energies* in the subject area of "Hydrothermal Carbonization". Hydrothermal carbonization (HTC) has been considered as one of the most viable pathways to treat wet biomass and wastes into energy, fuel, materials, and chemicals. The basic understanding of HTC for model biomass compounds has already been established. However, HTC technology advancement will require applied research on specific feedstock, process optimization, scale-up, and byproduct valorization.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
