

Topical Collection

Modeling and Design of Offshore Renewable Energy Systems

Message from the Collection Editor

You are cordially invited to submit papers to a new *Energies* Collection titled “Modeling and Design of Offshore Renewable Energy Systems”. Modeling and design of any and all marine renewable energy systems, such as offshore wind, wave energy, and ocean current/tidal energy, are of interest. Papers should focus on design of systems and/or modeling, which may include both numerical and experimental modeling approaches.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
