### Message from the Guest Editors

The proposed Special Issue hereby proposed shall cover most of the technical and phenomenological aspects of PQED.

Thus, we invite researchers working on subjects related to PQED to submit contributions to this Special Issue. Topics of interest include (but are not limited to) applications of PQED to:

Graphene;  
Transition-metal dichalcogenides (TMDs);  
Excitons;  
Valley quantum hall effect;  
Cavity effects.

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits
