Deadline for manuscript
submissions:

20 August 2024

Message from the Guest Editor

Aeronautical telemetry is a one-way air-to-ground radio link that transmits measurements made on an airborne test article to flight test engineers on the ground. The radio link is characterized by a long distance—in the order of 100 miles (161 km)—as being highly dynamic and hence having a high Doppler, and, when the elevation angle from the ground station is low, severe frequency selective multipath propagation. Error control coding has been used to improve data integrity in this non-ideal propagation environment as well as to extend the usable range between the test article and the ground station. The goals of this Special Issue are to assess the impact of the error control codes currently used in aeronautical mobile telemetry, examine potential improvements in error control coding, and to explore other forms of coding, such as physical layer security codes, space-time coding, coded modulation, etc., for potential applications in aeronautical telemetry.

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
