Exploring Fundamentals and Challenges of Heat, Entropy, and the Second Law of Thermodynamics: Honoring Professor Milivoje M. Kostic on the Occasion of His 70th Birthday

Guest Editors:

Dr. Pradip Majumdar

Professor (Retired), Department of Mechanical Engineering, Northern Illinois University, DeKalb, IL 60115, USA

Prof. Dr. Kevin H. Knuth

Department of Physics, University at Albany, 1400 Washington Avenue, Albany, NY 12222, USA

Message from the Guest Editors

The content of this Special Issue will highlight papers exploring fundamental thermodynamics topics such as availability, irreversibility, and entropy generation in thermal processes; Sadi Carnot's reversible equivalency; irreversible forcing and 'work-potential' dissipation with entropy generation; thermal energy concepts such as authentic-and-distinctive part of the total thermodynamic internal energy; as well as Maxwell's demon and other challengers of the second law of thermodynamics.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
