

## The Entropy Production—as Cornerstone in Applied Nonequilibrium Thermodynamics—Dedicated to Professor Signe Kjelstrup on the Occasion of Her 75th Birthday

Guest Editors:

**Prof. Dr. Dick Bedeaux**

PoreLab, Department of Chemistry, Norwegian University of Science and Technology, 7491 Trondheim, Norway

**Prof. Dr. Fernando Bresme**

Department of Chemistry, Imperial College London, London W12 0BZ, UK

**Prof. Dr. Alex Hansen**

PoreLab, Department of Physics, Norwegian University of Science and Technology, 7491 Trondheim, Norway

Deadline for manuscript submissions:

**31 December 2024**

### Message from the Guest Editors

The purpose of the Special Issue is to demonstrate the strength and importance of the theory of nonequilibrium thermodynamics, with its fundamental basis in entropy production, when used to improve the understanding of processes essential to mankind, industry or nature at large. The topics cover fundamental aspects and applications of all sorts, for instance the applications Kjelstrup worked on, includes but not limited to:

- entropy production as the proper basis for transport modelling
- entropy production and exergy analysis
- entropy production for surfaces
- entropy production and entropy balance in thermodynamic modelling of industrial processes
- entropy production minimization in nature and industry

at Albany, 1400 Washington  
Avenue, Albany, NY 12222, USA

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
