Entropy-Based Applications in Economics, Finance, and Management II

Guest Editor:

Prof. Dr. Joanna Olbryś
Faculty of Computer Science,
Bialystok University of
Technology, Wiejska Street 45A,
15-351 Bialystok, Poland

Deadline for manuscript
submissions:
closed (19 April 2024)

Message from the Guest Editor

Areas of interest include but are not limited to the following wide range of topics:

- Entropy-based applications in portfolio selection, asset pricing, and risk management;
- Entropy measures as indicators for systematic risk;
- Entropy optimization approaches in economics and finance;
- Entropy-based applications in market microstructure research;
- Shannon theory in fuzzy multiple criteria decision-making methods (FMCDMs) with applications to economic and management problems;
- Structural entropy in Bayesian network applications in economic, finance, and management.

Theoretical and empirical contributions addressing any of the aforementioned issues are especially welcome.

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
