

## Application of the Lattice Boltzmann Method for Particulate Flows

Guest Editors:

**Dr. Amir E. Fard**

School of Engineering, Newcastle University, Newcastle NE1 7RU, UK

**Prof. Dr. Vicente Garzó**

Departamento de Física and Instituto de Computación Científica Avanzada (ICCAEx), Universidad de Extremadura, E-06006 Badajoz, Spain

Deadline for manuscript submissions:

**closed (15 December 2022)**

### Message from the Guest Editors

The application of LBM to particle-laden flows can be traced back to three decades ago. This Special Issue will be an ideal opportunity to review and gather the latest progress in this fascinating interdisciplinary topic. Numerical studies on the following and other subjects related to LBM simulation of particulate flows are therefore warmly encouraged:

- Isothermal and non-isothermal simulations;
- Laminar and turbulent flows;
- Isotropic and anisotropic particles;
- Industrial simulations;
- Entropic LB methods;
- DNS, LES, and RAS;
- Comparison with classical CFD;
- Improvement of fluid–particle interaction modeling approaches;
- Numerical stability, accuracy, and speed;
- Immersed boundary and bounce-back methods;
- Curved boundary treatment;
- Optimization and machine learning techniques.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
