## Non-equilibrium Phase Transitions

Guest Editors:

**Prof. Dr. Carlos E. Fiore**

Instituto de Física, Universidade de São Paulo, C.P. 66318, São Paulo SP 05315-970, Brazil

**Prof. Dr. Silvio C. Ferreira**

Departamento de Física, Universidade Federal de Viçosa, Viçosa MG 36570-000, Brazil

Deadline for manuscript submissions:

**closed (29 February 2024)**

### Message from the Guest Editors

Nonequilibrium phase transitions is a broad research field emerging in many natural phenomena that operate intrinsically out of the equilibrium, in which the detailed balance and the full theoretical toolbox of equilibrium statistical mechanics are usually not applicable. Nevertheless, fundamental concepts such as universality, criticality and discontinuous transitions have been widely extended to the nonequilibrium realm whose interest have been burst with solid experimental evidences and interdisciplinary applications in the last decade.

We would like to invite you to contribute to a Special Issue in *Entropy* entitled "Non-Equilibrium Phase Transitions". The title is deliberately broad and we would hope to gather together a broad spectrum of contributions ranging from the foundational to applied problems including theoretical, simulational, and experimental approaches.

at Albany, 1400 Washington  
Avenue, Albany, NY 12222, USA

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
