## Probability, Integrability, and Conformal Invariance

Guest Editors:

**Prof. Dr. Eldad Bettelheim**

Racah Institute of Physics,  
Hebrew University of Jerusalem,  
Jerusalem 9190401, Israel

**Prof. Dr. Ilya Gruzberg**

Department of physics, Ohio  
State University, Columbus, OH  
43210, USA

Deadline for manuscript  
submissions:

**closed (30 April 2022)**

### Message from the Guest Editors

In recent years, exciting progress has been made in several topics of mathematical physics aimed at giving exact results to simplified models in physics, showing that progress can be made even in topics with a long and venerable history, such as conformal field theory or the Bethe ansatz. This Special Issue is devoted to recent developments in the application of the theory of the Bethe ansatz, conformal field theory, field theory in general, the stochastic Loewner equation, and random matrix theory to study classical and quantum problems encountered in physics. The focus is on the application of recent advances in mathematical methods in analytical calculation in physics.

Submission of contributions to this Special Issue is encouraged from all participants of the Probability, Integrability, and Conformal Invariance Program (<http://scgp.stonybrook.edu/archives/33651>) on 16 August–10 September 2021.

Avenue, Albany, NY 12222, USA

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
