Advances in Phase Field Modeling of Multiphase Flow

Message from the Guest Editor

Guest Editor:

Prof. Dr. Roberto Mauri

Laboratory of Reactive Multiphase Flow, Department of Civil and Industrial Engineering, University of Pisa, L.go Lazzarino, 56126 Pisa, Italy The aim of this Special Issue is to review the theory and describe some relevant applications of the phase field, actually known as the interface diffuse, model for one-component, two-phase fluids and for liquid binary mixtures to model multiphase flows in confined geometries.

Deadline for manuscript submissions: closed (15 February 2024)

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, PubMed, PMC, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
