

Axiomatic Approaches to Quantum Mechanics

Guest Editors:

Dr. Avishy Carmi

Faculty of Engineering Sciences
and Center for Quantum
Information Science and Tech-
nology, Ben-Gurion University of
the Negev, Beersheba, Israel

Dr. Eliahu Cohen

Faculty of Engineering, Institute
for Nanotechnology&Advanced
Materials, and Center for
Quantum Entanglement
Science&Technology, Bar-Ilan
University, Ramat-Gan 5290002,
Israel

Deadline for manuscript
submissions:

closed (15 September 2021)

Message from the Guest Editors

Dear colleagues,

The basic principles of quantum mechanics, which work so well in the lab, have always given rise to intensive conceptual debates. Alongside the search for better understanding of those principles, researchers have tried over the years to ground the mathematical structure of quantum mechanics with a small set of physically plausible assumptions. In recent decades, attempts have been made, for example, at deriving the set of quantum nonlocal correlations and the Born rule from information-theoretic and other sensible axioms. More recently, axiomatic approaches subsumed quantum field theory and the foundations of quantum thermodynamics. In addition, many glimpses have been made beyond the quantum formalism, e.g., attempts to relax some of the axioms of quantum mechanics in order to generalize it, possibly towards a quantum theory of gravity.

entropy

an Open Access Journal by MDPI

Editor-in-Chief

Department of Physics, University
at Albany, 1400 Washington
Avenue, Albany, NY 12222, USA

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
