

## Information Theory in Control Systems

Guest Editor:

**Prof. Dr. Adrian-Mihail Stoica**

Faculty of Aerospace  
Engineering, University  
Politehnica of Bucharest, 060042  
Bucharest, Romania

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editor

The aim of this Special Issue on “Information Theory in Control Systems” is to present new theoretical developments and potential applications bridging the areas of control, communications, and information theory.

Topics of the issue include, without being restricted to, the following:

- Networked control systems under communication constraints;
- Estimation and filtering theory for multisensor systems;
- Sampled-data control for networked control systems;
- Stochastic optimal control with randomized control strategies;
- Entropy-based approaches in optimal control;
- Feedback control, state-estimation, and consensus problems for multiagent systems;
- Entropy methods in estimation problems;
- Fault-tolerant control design for networked control systems with communication constraints;
- Feedback control under fading communication channels.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
