Message from the Guest Editors

Dear Colleagues,

This Special Issue will host papers presented at the 10th International Workshop on Applied Probability (IWAP2023), <http://iwap2020.web.auth.gr/>. The IWAP2023 covers many topics involving applied probability, whereas this Special Issue covers only topics of applied probability related to information theory and related applications. Thus, the main topics for this Issue include information theory in conjunction with stochastic processes, estimation theory, data analysis, data mining and Monte Carlo methods, as well as applications in diverse fields, such as finance and seismology, as stated in the main IWAP2023 topics.

Prof. Dr. Dimitris Kugiumtzis

Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

Entropy is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
