Message from the Guest Editor

Dear Colleagues,

Observational studies of the impacts of air pollution have been extant in the literature for 70 years and have been the basis for air pollution control regulations worldwide.

This Special Issue seeks epidemiological contributions in three related areas of temporal relationships: daily fluctuations; interventions—such as wildfires, accidents, fuel changes, and COVID-19 lockdowns—typically over periods ranging from weeks to months; longitudinal studies over periods ranging from years to decades. Endpoints of interest include mortality and various measures of morbidity, such as respiratory symptoms (including COVID-19), cardiovascular anomalies, and absence from work. Contributions are expected to adhere to established analytic guidelines including consideration of multiple pollutants, appropriate control of confounders, such as weather and season, and adequate consideration of and summation over lag periods. Accuracy and precision of air pollution exposure data should be discussed, including indoor environments. Reviews and papers challenging these guidelines will be considered, as well as comparisons with long-term studies.

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **PubAg**, **AGRIS**, **GeoRef**, and **other databases**.

Journal Rank: JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
