Message from the Guest Editor

Coastal ecosystems are dynamic, complex, and often fragile transition environments between land and oceans. The intensification of human activities in coastal areas in recent decades, as well as the global climatic changes and coastal erosion processes of the present, have introduced detrimental impacts on these environments. Organic and inorganic pollution; marine anthropogenic litter; destruction, fragmentation, and modification of habitats for multiple purposes; overexploitation of natural resources; introduction of invasive species; and loss of biodiversity are among the most common impacts.

In this Special Issue, I invite colleagues to contribute original research papers and review articles on all aspects of environmental quality monitoring and assessment of coastal ecosystems. There will be a focus on biotic or abiotic compartments (or both) as well as the range of ecological levels of the organization, from individual to ecosystem-wide efforts.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Environmental issues are quickly becoming central political, economic and academic topics of the twenty-first century. A large number of modern challenges are directly or indirectly caused by complex interactions between environmental issues. Such issues require interdisciplinary research, knowledge and insights to understand and, ultimately, for solutions to be found. Through the journal *Environments*, we strive to create a platform for meaningful discourse by accepting contributions from a wide range of fields. We sincerely hope you will consider publishing your distinguished work in this highly-accessible, peer-reviewed journal.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, ESCI (Web of Science), PubAg, AGRIS, GeoRef, and other databases.**

Journal Rank: JCR - Q2 (*Environmental Sciences*) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
