Epigenetic Mechanisms of Hematologic Malignancies

Guest Editor:

Dr. Richard L. Bennett

Division of Hematology and
Oncology, Department of
Medicine, University of Florida,
Gainesville, FL, USA

Deadline for manuscript
submissions:

31 March 2025

Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus on the role of epigenetic mechanisms in hematologic malignancies and anti-cancer therapeutics that target aberrant epigenetic mechanisms in these cancers. We welcome high-quality manuscripts (reviews, research, and technology tool articles) with a focus on the following areas:

- Epigenetic mechanisms that drive or contribute to hematologic malignancies;
- Novel epigenetic targets in hematological malignancies;
- Development or use of targeted epigenetic therapies for hematologic malignancy;
- Methods for identifying aberrant epigenetic mechanisms in hematological malignancies.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Ernesto Guccione

Icahn School of Medicine at
Mount Sinai, Hess Center for
Science and Medicine, New York,
NY 10029, USA

Message from the Editor-in-Chief

In the past years the growth of the epigenetic field has been outstanding, from here the need of a journal where to centralize all new information on the subject. The term epigenetics is now broadly used to indicate changes in gene functions that do not depend on changes in the sequence of DNA. *Epigenomes* covers all areas of DNA modification from single cell level to multicellular organism as well as the epigenetics on human pathologies and behavior.

Epigenomes (ISSN 2075-4655) is a fully peer-reviewed publication outlet with a rapid and economical route to open access publication. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [PMC](#), [PubMed](#), [Embase](#), [PubAg](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*Biochemistry, Genetics and Molecular Biology (miscellaneous)*)
