

Health and Bioactive Compounds of Fermented Foods and By-Products

Guest Editors:

Dr. Carlos A. Conte-Junior

1. Center for Food Analysis (NAL), Technological Development Support, Laboratory (LADETEC), Federal University of Rio de Janeiro (UFRJ), Rio de Janeiro 21941-901, RJ, Brazil

2. Laboratory of Advanced Analysis in Biochemistry and Molecular Biology (LAABBM), Department of Biochemistry, UFRJ, Rio de Janeiro 21941-909, RJ, Brazil

Dr. Anna Paula Azevedo De Carvalho

1. Department of Biochemistry, Federal University of Rio de Janeiro (UFRJ), Cidade Universitária, Rio de Janeiro 21941-909, RJ, Brazil

2. Research Support Group on Nanomaterials, Polymers, and Interaction with Biosystems (BioNano), Chemistry Institute, UFRJ, Rio de Janeiro 21941-901, RJ, Brazil

Message from the Guest Editors

Microorganisms—mainly lactic acid bacteria, and yeasts—can produce large contents of secondary metabolites with several health benefits and preservative properties. At the same time, some microorganisms can increase the levels of vitamins, antioxidant compounds, peptides, exopolysaccharides, organic acids, and other bioactive molecules. Fermented foods contain living organisms that contribute to the modulation of gut microbiota, physiology, and cellular redox homeostasis, meanwhile enriching the host diet with new bioactive compounds. Thus, recent advances have also reported anticancer and immunomodulatory potential in a preclinical stage of an investigation. Moreover, other recent advances in fermentation are focused on food by-products, especially as a potential source of bioactive compounds and food-derived biopolymers that, after fermentation, could be combined with nanotechnology and used as ingredients and additives for nutraceutical and functional foods. Understanding the health benefits of bioactive molecules of food fermentation and their by-products is a growing field of research in food science, preventive nutrition, and the treatment of diseases.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Badal C. Saha

Retired, National Center for
Agricultural Utilization Research,
USDA-ARS, Peoria, IL, USA

Message from the Editor-in-Chief

Welcome to a new open access journal, Fermentation, which meets the growing need for a high quality peerreviewed international journal with easy access to all researchers globally. We hope that you will share our enthusiasm for this new journal and look forward to working with you to make Fermentation a leader in its field. Your contributions are vital for the success of this new journal. Proposals for editing a special issue for a particular topical area are always welcome.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, FSTA, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biotechnology and Applied Microbiology*) / CiteScore - Q2 (*Plant Science*)
