### Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to collect high-quality review papers in all fields of microbial metabolism, physiology, and genetics. We encourage researchers from related fields to contribute review papers highlighting the latest developments in microbial metabolism, physiology, and genetics (including transcriptomics, proteomics, and genomics, as well as integrated approaches), or to invite relevant experts and colleagues to do so. Full-length comprehensive reviews will be preferred.

Let us share the science as widely as possible.
