Deadline for manuscript  
submissions:

**closed (31 August 2021)**

### Message from the Guest Editors

Dear Colleagues,

Owing to their excellent strength-to-weight ratio, fiber-reinforced composites (FRCs) have received significant attention in different applications, e.g., automotive, marine, aerospace, and construction. This Special Issue of *Fibers* is dedicated to fiber-reinforced composites (FRCs) for construction applications. We are expecting to receive papers dealing with cutting-edge issues on the research and application of FRCs containing internal fibers in construction applications.

The topics of this Special Issue include but are not limited to the durability, mechanical, thermal, and fire properties of FRCs, FRCs that are manufactured using different types of internal fibers (including recycled, natural, and synthetic fibers), FRCs containing nanomaterials, and the long-term properties of FRCs. Both original contributions and reviews are welcome.

## Message from the Editor-in-Chief

*Fibers* is intended as an integrative platform, bringing together specialists with expertise concerning a large range of biological, synthetic, metallic and mineral fibers. The intent is to bring together scientists who would otherwise be unlikely to encounter each other's findings. By facilitating communication across specialties, the journal will advance understanding of the underlying commonality of many physical and chemical aspects of fibers.

We welcome submission of manuscripts from a diverse range of disciplines relating to many types of fibers utilizing a variety of research approaches.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), PubAg, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Materials Science, Multidisciplinary*) / CiteScore - Q1 (Civil and Structural Engineering)
