Deadline for manuscript
submissions:

closed (30 June 2017)

Message from the Guest Editor

Dear Colleagues,

Man-made and natural silicate and silica-based mineral fibers have their boons and banes. They find wide spread application as material reinforcements, as thermal and acoustic insulators, as well as optical wave-guides, among others. Fibrous materials are, however, also known to induce respiratory tract diseases and to be the cause for cancer. We invite you, therefore, to participate in this Special Issue of *Fibers* with contributions on new developments in the manufacturing and applications of mineral fibers, but also on the toxicity of such fibers and methods to inertialize toxic fibers, such as asbestos.

Prof. Dr. Bernard Grobéty

Special Issue

fibers

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Martin J. D. Clift

In Vitro Toxicology Group,
Institute of Life Sciences 1,
Swansea University Medical
School (SUMS), Swansea SA2
8PP, Wales, UK

Message from the Editor-in-Chief

Fibers is intended as an integrative platform, bringing together specialists with expertise concerning a large range of biological, synthetic, metallic and mineral fibers. The intent is to bring together scientists who would otherwise be unlikely to encounter each other's findings. By facilitating communication across specialties, the journal will advance understanding of the underlying commonality of many physical and chemical aspects of fibers.

We welcome submission of manuscripts from a diverse range of disciplines relating to many types of fibers utilizing a variety of research approaches.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubAg, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Materials Science, Multidisciplinary*) / CiteScore - Q1 (Civil and Structural Engineering)
