Deadline for manuscript
submissions:

closed (31 July 2024)

Message from the Guest Editors

This Special Issue aims to foreground the diverse perspectives and experiences of living and working with fire. The objective is to bring together novel future-thinking and future-ready practices on reimagining life and work with fire in ways that can achieve caring, equitable, sustainable, and just outcomes.

A key incentive for this Special Issue is to address the growing challenge of managing catastrophic wildfires, which is one of the manifold impacts of deteriorating forest health, the fuel management crisis, and persistent social inequities that are leading to increased exposure to wildfires. Although a range of strategies are being employed to address this worsening crisis, the effective implementation will be challenging without sustained support for a skilled and diverse landscape and fire management workforce.

Message from the Editor-in-Chief

Fire is an international open-access journal about the science, policy, and technology of fires and how they interact with communities and the environment. *Fire* seeks to provide a forum to help the fire science community convey how we can live with fire in a changing world. *Fire* seeks submissions from interdisciplinary studies that take a pyrogeography perspective of fires occurring in natural, cultural, and industrial landscapes and how they interact with communities in the science-policy interface. *Fire's* Editorial Board are widely recognized international leaders. The journal emphasizes quality and innovation and has a rigorous peer-review process. I strongly recommend *Fire* for the rapid publication of your innovative research publications and case studies.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), AGRIS, PubAg,** and **other databases.**

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
