Laboratório de Patologia Experimental, UFMS, Campo Grande, Brazil

Dr. Lilian Franco-Belussi

Instituto de Biociências, Federal University of Mato Grosso do Sul, Campo Grande, Brazil

Dr. Juan Manuel Pérez-Iglesias

INQUISAL-CONICET, Universidad Nacional de San Luis, San Luis, Argentina

Deadline for manuscript submissions:

closed (15 July 2024)

Message from the Guest Editors

In recent years, a range of compounds, such as phthalates, the bisphenol family, pharmaceuticals, nanomaterials, a new generation of pesticides, industrial pollutants, personal care products, etc., now known as "emerging" compounds, have taken precedent in the literature since their direct or indirect effects on the aquatic ecosystem and human health remain unknown. Fish constitute a class of organisms with the greatest taxonomic and habitat diversity on the planet. Moreover, they represent the impact of human activities on aquatic ecosystems and productive systems. Therefore, the complexity of this topic makes it a real challenge to update scientific knowledge on the range of emerging biotic and abiotic factors to which the environment and organisms are subjected.

In this context, this Special Issue of *Fishes* offers its readers a broad approach to "Physiological Changes in Fish Exposed to Emerging Stressors" to support new debates and advance knowledge on this broad topic.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubAg](#), [FSTA](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Marine and Freshwater Biology*)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2024).
