Deadline for manuscript
submissions:

10 January 2025

Message from the Guest Editor

Aquaculture production is essential to meet the increasing protein demands of the world's population in the coming decades. Technological advances are essential to increase productivity in order to guarantee food security, reduce poverty and minimize possible environmental impacts. In this sense, production in bioflocs systems allows for increased productivity, reduced water use, greater biosecurity and a lower production of effluents that are released into the environment. There are still a series of topics that must be studied to improve the production of fish and shrimp, among other organisms, with bioflocs.

In this way, we invite researchers to contribute their original research, reviews, case studies and/or recent progress/scenarios on the production of aquatic organisms with bioflocs.

an Open Access Journal by MDPI

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubAg](#), [FSTA](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Marine and Freshwater Biology*)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2024).
