

Special Issue

Nutrition and Immune Responses in Aquatic Animals

Message from the Guest Editors

Nutrition is one of the most important factors affecting the immunity and disease resistance of aquatic animals. Nutritional balance is the basic element for aquatic animals to obtain superior immunity. On the other hand, feed additives such as polysaccharides, antioxidants, probiotics, prebiotics and Chinese herbs, found to promote the immune response and stress resistance, are used as immunostimulants for aquatic animals. These studies will promote the green and sustainable development of aquaculture. Therefore, we are pleased to invite you to contribute to the Special Issue “Nutrition and Immune Responses in Aquatic Animals” of the journal *Fishes*.

About the Journal

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Maria Angeles Esteban

Department of Cell Biology and Histology, Faculty of Biology, University of Murcia, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, FSTA, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology)
