Ventilation and Passive Cooling for Healthy and Comfortable Buildings

Guest Editors:

Dr. Ben Richard Hughes

Department of Mechanical Engineering, University of Sheffield, Sheffield, UK

Dr. John Kaiser Calautit

Architecture and Built Environment, University of Nottingham, Nottingham NG7 2RD, UK

Deadline for manuscript submissions:

closed (30 September 2019)

Message from the Guest Editors

The building sector has substantial scope to reduce the energy use associated with the operation and maintenance of buildings worldwide. Of this total energy demand, heating, ventilation and air-conditioning (HVAC) accounts more than half of the electricity consumption. Passive strategies, in particular natural ventilation, are one of the main techniques to moderate temperatures in buildings, reduce operating cost and provide better indoor air quality and comfort. The aim of the proposed issue is to present the recent developments on the modelling and experimental methods for the analysis of ventilation and passive cooling technologies/strategies. We invite researchers to contribute original research articles and review articles, dealing with all aspects of passive cooling and ventilation in the built environment. These contributions include new modeling and experimental studies, methods and advances focused on the evaluation of indoor ventilation, flow and pollutants.

Message from the Editor-in-Chief

Fluids (ISSN 2311-5521) is an international journal on all aspects of fluids in open access format: research articles, reviews and other contents are released on the internet immediately after acceptance. You are invited to contribute a research article or a comprehensive review for consideration and publication in *Fluids*. The scientific community and the general public have unlimited free access to the content as soon as it is published. Please consider *Fluids* as an exceptional, exciting enterprise ready to reward your trust, attention, and active participation.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q2 (*Mechanical Engineering*)
