### Message from the Guest Editor

Food offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. Active ingredients of natural products are often included in food products, causing their impact on our health. Our task is to assess both the beneficial and harmful (toxic) effects of these ingredients. Particular consideration should be given to their beneficial effects on human and animal health. Research may concern both these activities and the qualitative and quantitative composition of these substances using modern analytical methods.
